Hon. Daniel M. Fox,

Director, U. S. Mint.,

Philadelphia.

Dear Sir:-

We are now building some locomotives in which we are required to use composition metal with 10 per cent. nickel and 90 per cent. copper. As we are not familiar with the use of nickel in our business, we shall be much obliged if you will arrange that Mr. Thomas Billingsfelt, our Foreman of Brass Foundry who will present this letter, may learn something from your experience in melting nickel that will be useful to us in making the composition above referred to.

Very truly yours,

Burnham, Parry, Williams & Co.
